SOUND & VIBRATION

# New features - but still the same

## Improved materials

KEMAR's previous fiber glass construction has been updated to a plastic composite that provides a more user friendly and ruggedized construction

## Snap fit ear simulators

Mount and dismantle the ear simulators with one hand for ear-canal exchange or calibration

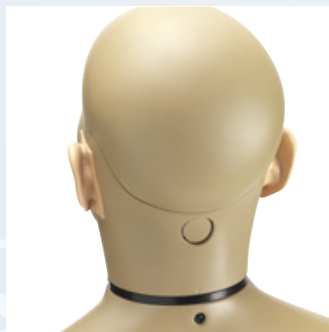

## More mounting options

KEMAR is delivered with two tripod adapters; one for tripods with 3/8" thread and one for ø35 mm loud-speaker stands

## Convenient Connections

The internal cable connections have been moved to the neck for greater accessibility

## 1-Click Access

The scalp is easily removed with the new release button to provide easy access to the inside of KEMAR

## KEMAR for your needs

KEMAR is available in several application specific configurations: assembled, calibrated and delivered as a complete out-of-the-box system for immediate use
